

Family Activity Guide

Upside Down - Episode 2
May 3rd, 2020

This week, your kids can make floating paper boats. All they need is a piece of paper! Here are the instructions:

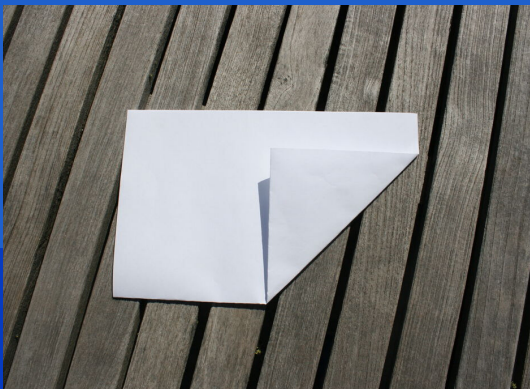

Step 1: Fold paper in half, hamburger style.

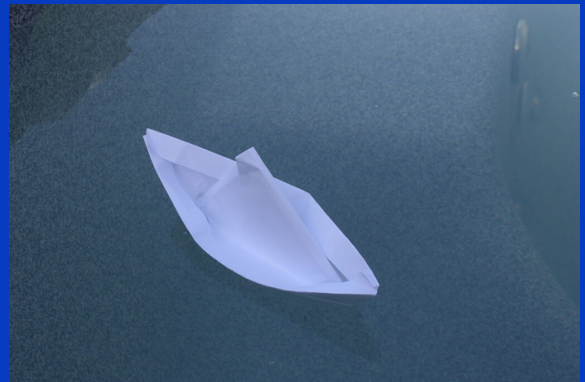

Step 3: Fold the excess edges over the folded corners and to the other side.

Step 2: Then take the folded corner and bring it in an inch away from the other folded edge, then do the same to the other corner.

Step 4: Fold out the edges of the paper so that the cone in the center sticks up, add volume to your boat by sticking your fingers into this cone. And folding up the edges around it.

Be sure to record your kids' floating boats and post them to our Kids Rock Facebook page!
